

Introducing a new transport solution:

MOVING CUSTOMERS WITH AUTONOMOUS SHUTTLES

TRANSDEV AND YOU SHAPING THE FUTURE OF TRANSPORT

As Journey Makers, Transdev is at the forefront of the autonomous shuttle revolution as we merge decades of expertise in operating integrated public transportation systems with our entrepreneurial and innovative spirit.

Across 19 countries, we help our customers understand and evolve with new transport solutions, keeping our focus on what matters most - moving customers seamlessly across multiple modes of transport. We help shape and transform our cities and communities from every corner of the globe, creating world class transport networks. We are part of a community of 83,000 people worldwide, and the largest private operator of public transport in Australia and New Zealand. We are ready to partner with industry and governments to take autonomous shuttles from futuristic concept to a viable transport solution.

*Transdev has transported
over 2 million
customers and travelled
350,000 km
by autonomous shuttles*

We believe the future of transport will be P.A.C.E. -
Personalised, Autonomous, Connected and Electric."

René Lalande, Chief Executive Officer, Transdev Australasia

A large crowd of diverse people is shown in the lower-left corner, appearing to wait for public transport. The image is partially obscured by a diagonal white graphic element.

AUTONOMOUS SHUTTLES: A READY TRANSPORT SOLUTION

Self-driving shuttles offer a powerful solution to fill existing gaps in our cities' transport networks, and the technology and its application is rapidly evolving.

BENEFITS OF AUTONOMOUS SHUTTLES

Getting you there, keeping you moving

Automated shuttles move people around campuses, within communities and through shopping centres.

Applications include:

- Corporate, medical and university campuses
- Industrial sites and energy complexes
- Theme parks and resort attractions
- Office parks and shopping centres

Improving first mile/last mile connectivity

Providing solutions to link people from home and workplaces to public transport hubs.

Enables:

- Improved customer experience
- Increase in patronage
- Removal of network inefficiencies
- Safer networks

Merging pedestrians and shuttles on urban pathways

Automated shuttles navigate narrow paths, easily change directions without requiring a U-turn, keeping pedestrians safe.

Improving our cities:

- Planned communities
- Airport inter-terminal and parking connections
- Concert halls and sports venues

A woman in a purple jacket and a woman in a white coat are standing near a self-driving shuttle. The woman in the purple jacket is holding a smartphone. The shuttle has a 'transdev' logo on it.

WHY PARTNER WITH TRANSDEV?

Self-driving shuttles bring new challenges that require new skill sets. We are committed to helping our partners to effectively navigate the many technical aspects of operations.

A modern building with a large dome and a blue sky with clouds. The building has many windows and a glass facade. There are some yellow leaves in the foreground.

Transdev's dedicated Automated Shuttles Technology and Operational Support team provides:

- 
- Expertise in all aspects of operating autonomous shuttles
 - Sophisticated routing algorithms and dispatch technology to optimise fleet management, with technology to optimise vehicle supply to match real-time demand
 - Digital control centres to monitor vehicle condition (tyre pressure, temperature, battery status), as well as digital and traditional maintenance for optimal fleet performance
 - Mobile apps to deliver a seamless customer experience, including Mobility as a Service (MaaS)
 - Best practices for safety and security in all aspects of transport operations
 - Data collection, management & analytics to ensure routing efficiency, on-time performance and vehicle optimisation
 - Customer segmentation data to understand future planning and patronage growth
 - Knowledge of strengths and weaknesses of vehicle manufacturers, and strategic advice on procurement and vehicle selection

ROLL WITH **TRANSDEV** TODAY

If you're looking to see how automated shuttles can enhance your neighbourhood, campus or network, contact us for a free initial consultation. For more information, get in touch at **innovation@transdev.com.au**
